

OEL 1018-64

21 October 1964

MEMORANDUM FOR: Deputy Director for Science and Technology

25X1A

SUBJECT : Measurements

25X1A

You have indicated that SAC is optimistic about the "O" not being detected. Limited measurements which we have taken thus far at indicate that FAN SONG detection ranges are in reasonable agreement with the predicted ranges of about 50 miles.

25X1A

Tasks scheduled for this week include measurements with Although this data is not extensive, it might be of interest to SAC. Shall we communicate our results thus far to them?

GEORGE C. MILLER
Assistant Director for ELINT
